# Be Smart, Be Quick

**Directions:** Play with 2 people or a classroom full of students. Start by writing all the categories on a 10" playball with a black marker using the examples given or create your own. In a big circle roll the ball to a player and whatever category their right hand lands on they must list one thing that applies to the category. Continue to roll around the room but pay close attention to what the people before you have said because you can't repeat words. If you repeat a word you are out. Be quick and be smart to be the last person standing!
