

Firework Explosion

Directions: Follow the instructions below for a kid friendly science experiment this 4th of July.

What You'll Need:

Bowl

Milk

Red and Blue Food Coloring

Liquid Dish Soap

Start by putting milk in your bowl to be about 1/2 inch thick. Have an adult help you add 2-4 drops of food coloring in the center.

Then take your dish soap and put a small drop right in the center. Watch as the colors fly in all directions like a firework explosion!
