

Fruity Fans

Directions: Cut out the fan pieces. Fold the fan pieces back and forth like an accordion. Glue the two ends of the fan together to create one long chain and glue two popsicle sticks to the back side of the end panels of your fan. Let dry, then fold the fan in a circle until the two ends of the sticks meet and glue or tape the sticks together! If you don't have popsicle sticks you could cut out thin strips of cardboard to use instead. Once everything is dry you can use your fan to make a nice breeze on a hot summer day.

Connect the bottom panel onto the back of this one to make one long chain

Cut on solid line _____

Fold on dotted line - - - - -
